

# Preliminary idea for Ambrose's GradEx submission

## What is to be presented

- The primary artefact will be ceramic bowls similar to those created for my MRP but re-created for GradEx. (The original bowls have been distributed as part of my MRP.)
- These will be accompanied by a text panel (most likely smaller than a typical research poster) to explain the ideas behind the project.
- A secondary artefact, a re-creation of the printed survey, might also be shown.

## Space requirements

- I will need the dimensions of the actual space allocated to plan the physical setup.
- At this point, I estimate the width of the actual space required to be approximately as wide as one or two research posters (Figures 1, 2).

Figure 1. Possible physical arrangement of the display. The grey area shows the size of a 11" × 17" piece of paper (likely the size of my panel). The dotted area shows the size of a typical research poster (4' × 3').

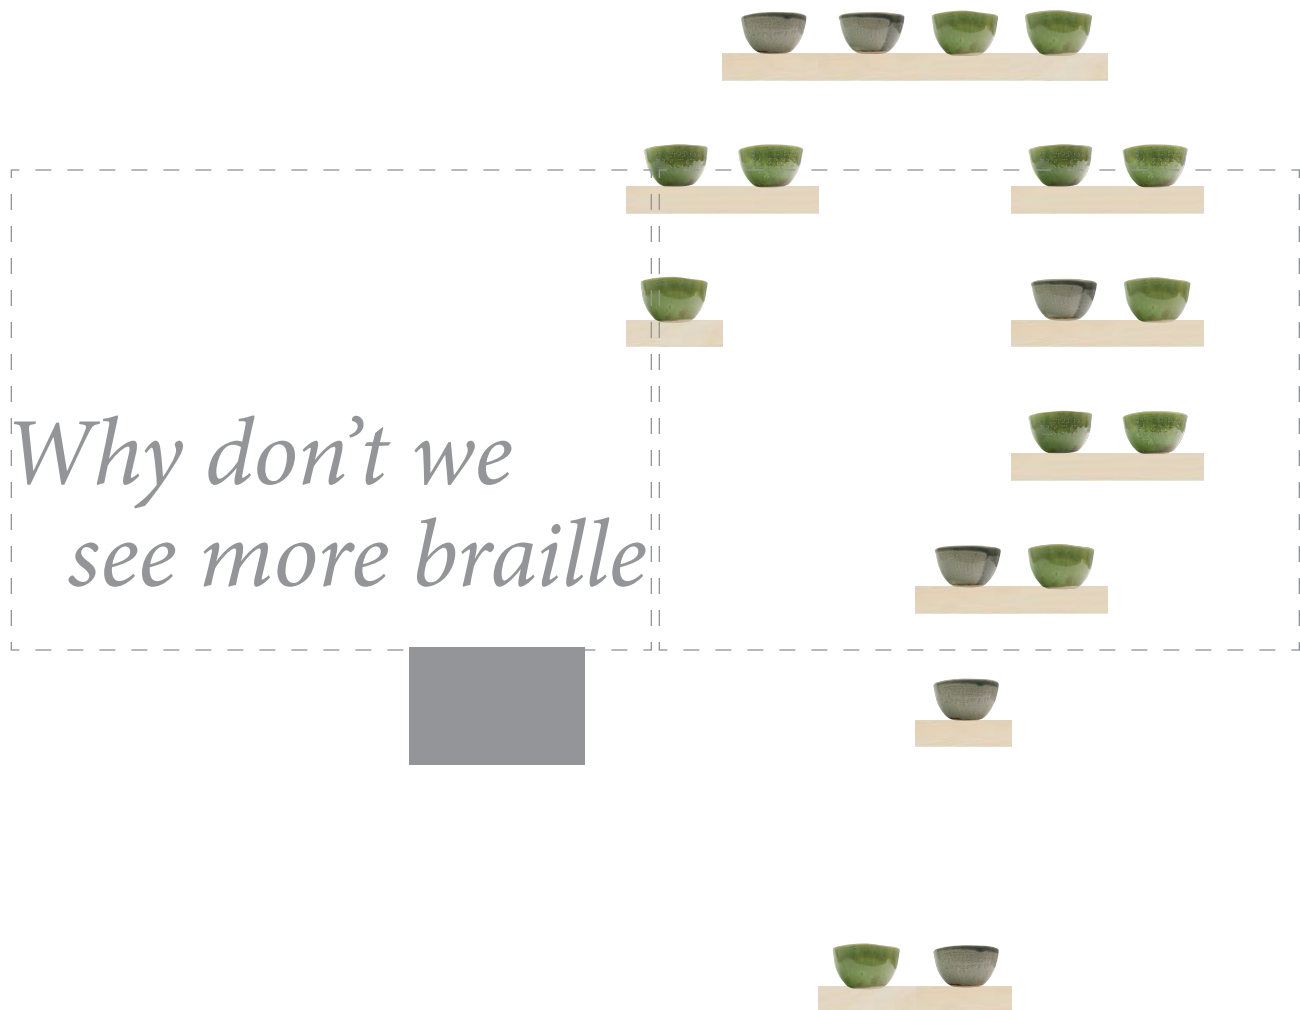

Figure 2. Possible alternate physical arrangement of the display. The grey area shows the size of a 11" × 17" piece of paper (likely the size of my panel). The dotted area shows the size of a typical research poster (4' × 3'). Other arrangements are possible and depend on the actual physical space allocated.
